

IQ Prisons Showcase

Prisons have some unique priorities. They have to keep their inmates safe. They also have to ensure that they are securely held cannot escape. Their movements need to be monitored to ensure that they are not engaged in fighting or attempting to commit suicide and their visitors need to be vetted.

iOmniscient's Artificial Intelligence based Multi-Sensory Analytics Platform helps Prisons in many countries to address these many use cases..

With 60+ International Patents, iOmniscient specializes in addressing complex and crowded environments – doing things that no one else can do. In the video analytics arena, the company has the most comprehensive suite of Detection, Tracking and Recognition capabilities, from simple intrusion and counting systems to unique object detection in a crowd, multi-lingual License Plate Recognition & the world's first non co-operative Facial Recognition for Crowded Scenes. These technologies are sewn together in various combinations to address the many use cases required in prisons.

iOmniscient does MORE with LESS. Its solutions require fewer cameras, 90% less storage and network bandwidth and less computing resources. You can implement an intelligent system at ZERO incremental cost relative to a less intelligent system.
